

Loved the book from start to finish! Normally I read a fiction book at the same time as a non-fiction in case I need a break but I didn't need to. Just because it was an easy read didn't mean it was light on information or that it wasn't challenging. As an analytical type I thought through my retirement 3-5 years before I pulled the plug. If I'd had your book 7 years ago I wouldn't have had to reinvent the wheel. I think you covered all the bases (and) ensured that people think about all the components of retirement. You made it clear that while every hand is different, retirement should be made to fit like a glove. You have put together a well written book.
